

Introduction of Demo

Running

Add folder and subfolder of "hdrvdp" to Matlab Path.

Functions

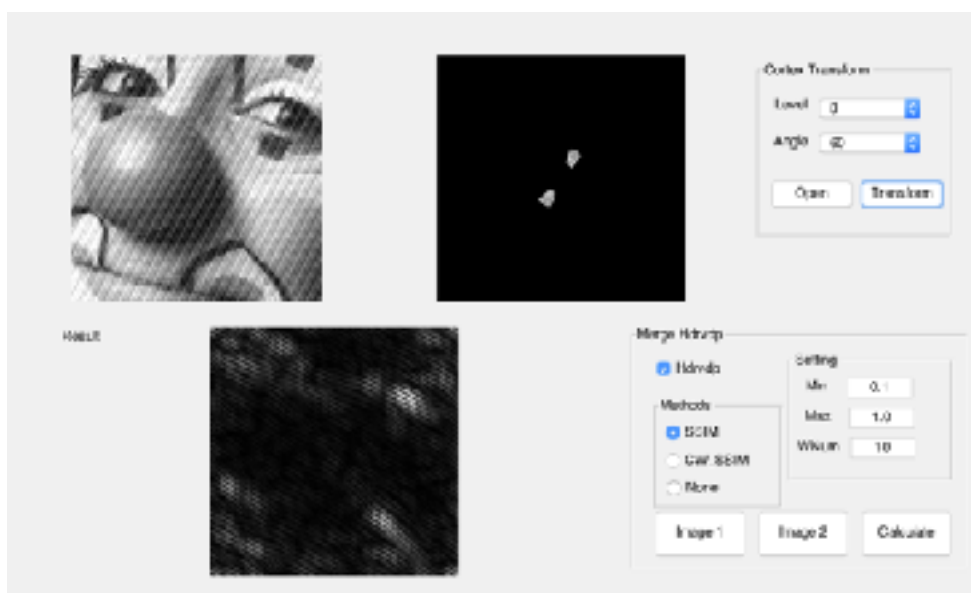

1. cortex transform

Parameters:

level: size of Fourier transform mask filter

angle: angle of Fourier transform mask filter

example: level: 3 and angle 60

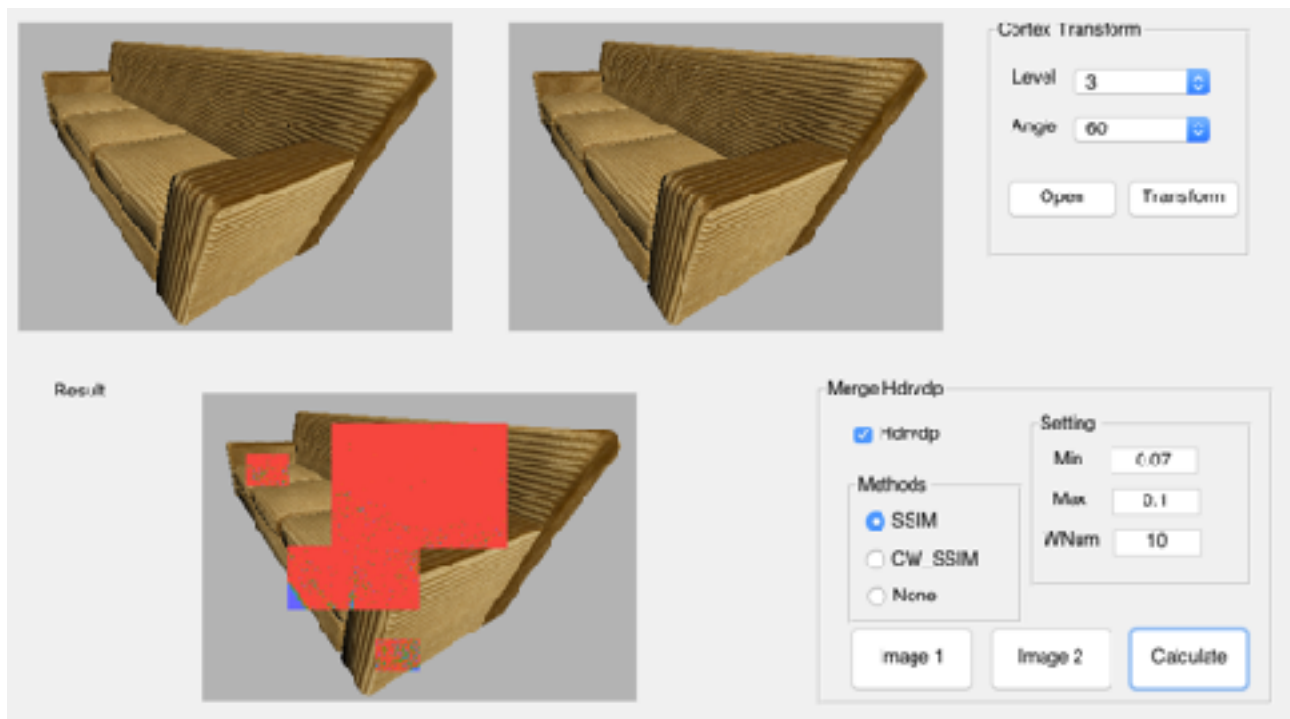

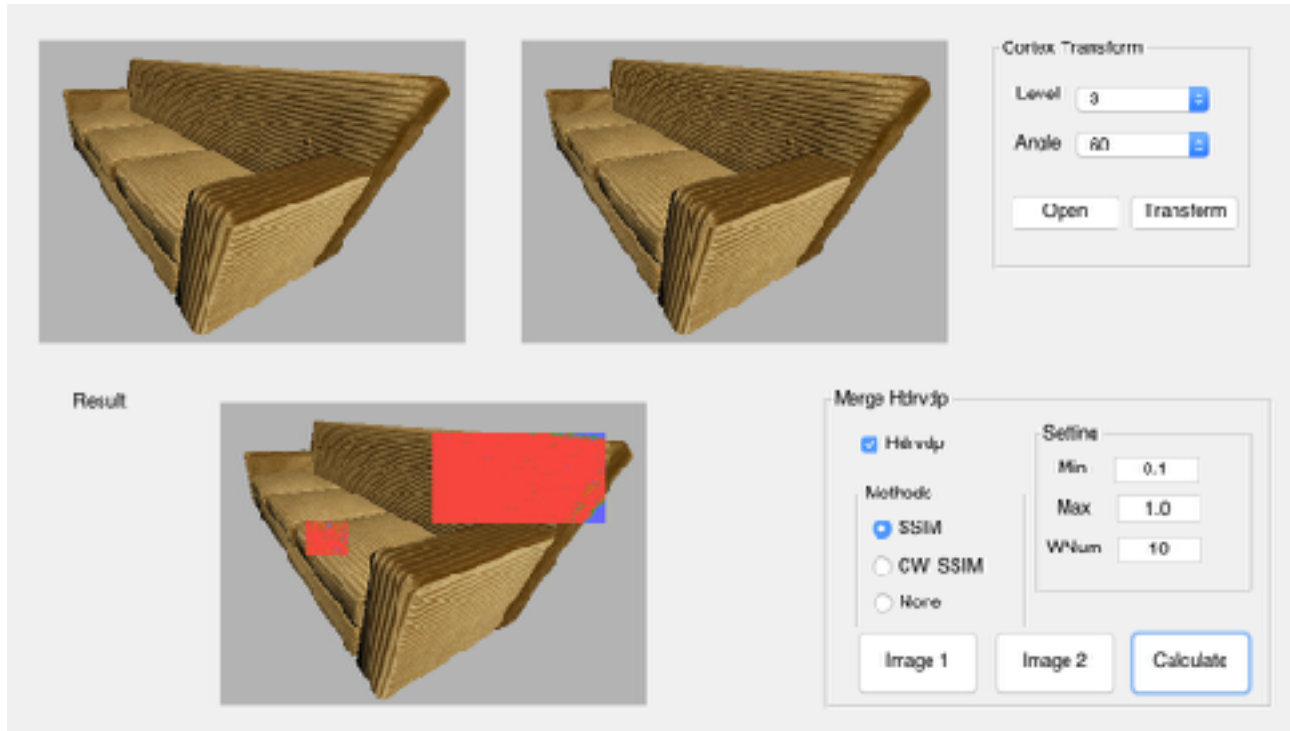

2. Merged Hdrvdp

Parameters:

Min, Max: range of ssim value.

WNum: crop window number, 10 means the image divided to 10*10 patches.

examples:
